**Unified System, Business Process Automation, Compliance Rules Engine, Enables Unparalleled Efficiency in Contracting, Appointments, Data Maintenance**

**Market Leading Solution**

*Xchange*, RegEd’s Enterprise Registration and Licensing solution, developed in collaboration with top industry firms, has been implemented in over 150 financial services firms across the nation. *Xchange* is unique in its ability to drive unparalleled operational efficiency and optimize all processes across contracting / on-boarding, licensing, registration and appointment activities. Producers / reps self-service licensing and registration transactions via a private-labeled web front-end; data is captured once and then reused and updated automatically through integration with regulatory databases and relevant internal systems. *Xchange*’s rich and comprehensive capabilities dramatically reduce transaction processing time -- often by 50% or more. *Xchange* improves speed to market, increases producer / rep satisfaction and maximizes the opportunity for revenue generation.

*Xchange for Property-Casualty Carriers* is the only solution to fully integrate producer data, business process automation and transactional processing for insurance carrier appointments and appointment renewal processing in a single system.

*Xchange* seamlessly enables the contracting process for carriers with multiple distribution channels including brokers, wholesalers and aggregators.

*Xchange*’s robust workflow capabilities can be tailored to the firm’s hierarchy to enable precise routing, in a specified sequence, ensuring that required approvals are received from designated approvers, prior to submission to NIPR and state filing offices.

For companies with captive distribution, *Xchange for Property-Casualty Carriers* is powered by an extensive compliance rule base that precisely calculates the licensing and CE requirements for single and multi-jurisdiction licensing and renewal transactions. This significantly reduces non-compliance exposure due to miscalculated CE requirements.

*Xchange* drives efficiency throughout the contracting, appointment and appointment renewal process. Using *Xchange*, producer data is prepopulated from NIPR or internal systems and automatically reused for required appointments, renewals and terminations. All filings are completed and submitted with ease; captured data is updated automatically through integration with the NIPR, as well as relevant internal systems. Additionally, the solution triggers critical alerts and notifications upon changes to producer / agency profile information or when profile or appointment data is not fully in sync with the official filing office record.
Built-in validations and an extensive regulatory rule base ensure that submitted transactions are in good order, reducing the instance of filing rejections.

*Xchange* integrates sophisticated business process automation that enables the auto-generation of appointment requests based on designated events; filings in good order are processed straight-through and new filings are automatically generated when relevant producer / agency information is updated.

For insurance companies with captive distribution, *Xchange* fully automates CE tracking. Completed courses are tracked against the specific requirements they satisfy and outstanding credit reminders are automatically sent via email at regular intervals.

**Unique Capabilities for Property-Casualty Carriers**

**Just-In-Time (JIT) Contracting and Appointments**

Contracting workflows can be configured to generate and hold appointment requests until the producer submits their first business. *Xchange* applies company appointment rules to all relevant appointment transactions. For example, once *Xchange* receives notification of business placement, and all validations pass, a producer production number is generated. And, because the majority U.S. filing jurisdictions support real-time appointments, producers can be instantly appointed upon placing business.

**Eliminate Non-Productive Appointment Renewals**

Prior to confirming appointment renewals, *Xchange* automatically validates producer production levels against active, renewing appointments enabling the carrier to isolate and eliminate non-productive appointments. Carriers that have implemented *Xchange* report that this capability has resulted in saving hundreds of thousands of dollars in appointment fees for non-productive producers.

**Flexible Hierarchy Management**

*Xchange*’s sophisticated hierarchy management capabilities greatly simplify the process of maintaining the ever-changing relationships among producers, agencies and brokerages. A full audit trail of all changes is automatically captured, enabling the carrier to readily respond to inquiries from regulators, market conduct examiners and internal stakeholders.

**On-Demand Reporting**

*Xchange*’s robust ad hoc reporting capabilities enable licensing center operations to efficiently manage and track the compliance status of producers across each of the carrier’s distribution channels.

**Maintain Current and Accurate Producer Credentialing Data**

*Xchange* integrates multiple utilities that automate, validate and synchronize critical compliance data to eliminate manual, redundant processes and the need for human intervention, ensuring distribution channel data is current and accurate. Core capabilities include:

- Data reconciliation with the NIPR ensures critical compliance data is in sync with the official filing office record.
- Automatic data updates and *NIPR Alerts* continuously update compliance data, ensuring that requested transactions are in good order.
- Real-time validations upon order entry ensure that proper credentials are held prior to placing business.
Other Distinguishing Capabilities

- **Xchange for Property-Casualty Carriers** provides a single, integrated solution that fully automates contracting, appointment and appointment renewal processes.

- Automatic notification of upcoming exams, insurance CE and annuity product training requirements for carriers with captive distribution.

- Robust hierarchy and workflow management and automated validations reduce the need for manual oversight, ensuring transactions are in good order for acceptance by the state filing offices.

- Business process automation triggers transaction creation for appointments and appointment renewals, based on defined events, eliminating the need for licensing staff intervention.

- Robust exception handling alerts licensing operations to any credentialing issues including disparities between producer role and licenses held or between licenses held and products being sold.

- Comprehensive dashboards provide unified views of contracting, appointment and appointment renewal status and exceptions.

- Enterprise reporting capabilities generate both templated and ad-hoc reports across the carrier’s appointed population, at any level of the company’s hierarchy.

Key Benefits

- Efficient transaction processing and management by exception enables dramatic efficiencies and speeds producer time to market.

- Automatic data synchronization of producer data with the NIPR ensures that accurate data populates transactions, reducing non-compliance risk.

- Business process automation drives efficiency in transaction preparation, transaction processing and data maintenance, while eliminating non-productive appointments. This enables the firm to realize a material return on investment.

- Real-time validations enable appointments only upon business placement, reducing appointment fees and ensuring that producers are properly credentialed for the business being placed.

- Comprehensive reporting enables the firm to readily produce documentation to satisfy requests from internal stakeholders and regulator examiners, reinforcing “culture of compliance” perceptions.
Why Choose RegEd?

RegEd is the leading provider of compliance management, licensing and registration and compliance and product education solutions to the financial services industry. Our solutions deliver unparalleled levels of operational efficiency and enable firms to cost-effectively comply and manage risk associated with state, FINRA and SEC regulation.

➢ An investment in RegEd technology translates into extraordinary long-term value. Firms can cost-effectively build on their initial investment as their needs evolve, maximizing the return and value for their compliance spend.

➢ RegEd solutions are continuously expanded using input from solution-specific client advisory boards.

➢ Clients view RegEd as an extension of their organization. They are assigned an experienced implementation project team and have a dedicated support team, including a relationship manager, product support experts, and experienced, engaged customer service professionals.
